Filing Date: October 14, 2003

: Attorney Docket No.: 7842-1U6RE

January 4, 2002

Title: Printed Sheet Mailers and Methods of Making

SUPPLEMENTAL REISSUE DECLARATION

As a below named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name.

I believe I am the original, first and sole inventor or an original, first and joint inventor of the subject matter which is claimed and for which a reissue patent is sought on the invention entitled

INTEGRAL PRINTED SELF-MAILER SHEET PRODUCTS

the specification of which is attached hereto and was originally filed on April 27, 1998, as Application No 09/067,090 and issuing as U.S. Patent No 6,010,159 on January 4, 2000.

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by the Preliminary Reissue Amendment filed with the reissue application.

I acknowledge the duty to disclose information which is material to patentability in accordance with Title 37, Code of Federal Regulations, Section 1.56.

I hereby reaffirm my claim of benefit under Title 35, United States Code, Section 120, of any United States application(s) listed below and, insofar as the subject matter of each of the claims of this application is not disclosed in the prior United States application or in the prior U.S. provisional application in the manner provided by the first paragraph of Title 35, United States Code, Section 112, I acknowledge the duty to disclose information material to patentability as defined in Title 37, Code of Federal Regulations, Section 1.56, which occurred

between the filing date of the prior application and the national or PCT international filing date of this application:

<u>08/724,077</u>	<u>9/30/1996</u>	<u>Patented</u>
(Application Serial No.)	(Filing Date)	(Status)--(patented, pending, abandoned)

<u>08/911,806</u>	<u>8/15/1997</u>	<u>Patented</u>
(Application Serial No.)	(Filing Date)	(Status)--(patented, pending, abandoned)

I verily believe the original patent to be wholly or partially inoperative or invalid, by reason of claiming less than I had the right to claim in the patent, by reason of failing to claim priority from another copending U.S. application from which I had a right to claim priority and because of errors in the drawings causing an inconsistency between the drawings and the text of the specification. At least one excess or insufficiency in the claims is specified below.

I discovered that the claims of the issued patent do not adequately cover articles of manufacture disclosed in the patent. In particular, the different aspects of the invention disclosed in this patent do not require a core "formed by first and second core strips of different materials positioned side-by-side..." as is set forth in patent claim 1. I hereby indicate my intent to broaden the claims of the issued patent in this reissue application.

The original patent failed to claim priority to U.S. Application No. 08/911,806 filed August 15, 1997, now U.S. Patent No. 5,863,076, to which priority I was entitled.

Fig.12 and Fig. 13 were improperly reversed in the original patent. To conform to the references in the specification, Fig. 12 should have been labeled as Fig. 13 and Fig. 13 should have been labeled Fig. 12

All errors sought to be corrected in this reissue application up to the time of filing this declaration arose without any deceptive intention on my part or on the part of the patentee, Vanguard Identification Systems, Inc.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

Full name of sole

inventor, Richard O. Warther

Inventor's Signature

Richard O. Warther
